

KINCORA COPPER

ASX: KCC · TSXV: KCC

Multiple Pathways to World-Class Gold-Copper Discovery in Australia

JULY 2026

www.kincoracopper.com

CORPORATE OVERVIEW

Kincora is an institutional-grade gold-copper explorer with a district-scale portfolio across Australia's premier mining jurisdictions

Our hybrid prospect generator model delivers multiple discovery opportunities with enhanced leverage to exploration success assembled by our industry-leading technical team

CORPORATE

Snapshot

Differentiated Hybrid Prospect Generator Model

Leverages "*traditional*" and "*next generation*" geoscience via partner-funded and self-funded exploration to maximize discovery potential while preserving shareholder capital and minimizing dilution

Industry-Leading Technical Team

Proven leadership with a strong track record of multiple Tier-1 discoveries and value creation across the mining sector

Multiple Near-Term Catalysts Across a Diversified Portfolio

Exposure to 8 active projects, each with a clear strategy for value creation

Tier-1 Exploration and Mining Jurisdictions

Located in world-class discovery districts, the Macquarie Arc and Cobar Basin, two of Australia's premier mining regions

Strong Balance Sheet, Tight and Aligned Capital Structure

Well-capitalized: >\$13M in cash, US\$5M cash pending and management fee income
Leverage to structure: <48 million shares outstanding and tightly held (~45% free float)

WHY INVEST

Hybrid Prospect Generator Model

With Further Deals to Increase Scale

+\$100M

potential third-party
asset level investment

+\$10M

in partner-funded
exploration since late 2024

+20,000m

drilled across 7 licenses

+\$600,000

received in
management fees

Strategic Benefits

- Lower Capital Requirements
- Lower Exploration Risk With Partners, Tech and Portfolio Diversification
- Tighter Capital Structure
- Higher Leverage to Discovery Potential

References provided in the Appendix

“Prospect Generators are arithmetically the best way to speculate in the exploration business. The pay-off is unassailably better than the industry as a whole.”

COBAR BASIN

Condobolin Project

DISTRICT PROJECTS

Consolidation accelerating in the Cobar District

High-grade gold rich critical mineral deposits

Under-utilized infrastructure/mills

Active M&A

MATURE MINES – Initial focus of recent M&A

Active since 1870 - Long plant capacity/Short ore

- Harmony's A\$1.6b acquisition of MAC Copper
- Aeris's >A\$200m deal with Peel Mining
- Validates strategic premium on high-grade deposits

RECENT DISCOVERIES

Emerging new mining districts – scope for next leg of M&A

EMERGING DISTRICTS

Emerging discoveries in old mining districts

References provided in the Appendix

ASX: **KCC** · TSXV: **KCC**

Condobolin project

LOCATION	SIZE	STAGE	FUNDING BY	CATALYST
Cobar Basin	242km ²	Brownfield	Kincora	Drilling
TARGETS District scale historical mining field - Meritilga, Phoenix and Tilga targets - Near surface high-grade epithermal gold, silver-base metals at Meritilga discovery - Deeper intrusion(s) driving multiple zoned at/near surface hydrothermal systems/targets				
Historic / Nearby Production - Historical mining district with water table constraints - Access to nearby third-party milling capacity and excellent infrastructure - Located within an active M&A and consolidation region		Kincora Strategy - Consolidate mining field: project footprint expanded by one-third - New airborne survey: Regional and infill EM geophysics completed - Remodeling of all geophysics - First systematic drilling in over a decade underway at an open discovery - Ongoing drilling at Meritilga testing extensions and new anomalies - Fully funded follow-up drilling planned post structural geological review/assay results, expanded regional surface exploration, with multiple additional targets identified

FUNDING BY
**AngloGold
Ashanti**
CATALYST
Drilling
TARGETS
Nevertire, Nevertire South, Nyngan, Nyngan South & Mulla licenses

- Epithermal gold-base metal style mineralization
- Porphyry related copper-gold

Exploration Concept

- Southern Macquarie Arc hosts >160Moz AuEq endowment in out/sub-crop
- Regional geophysics map the major intrusive complexes hosting these large systems
- Regional geophysics supports the extension of the Macquarie Arc north under cover, highlighting large scale untested targets
- This concept is supported by >A\$30M of exploration investment/drilling to date

Kincora Strategy

- Two earn-in/JV agreements with AngloGold Ashanti providing for up to A\$100M in exploration investment
 - Kincora is currently the operator and receives a 10% management fee on partner-funded exploration expenditures
- First phase scout drilling at Nyngan completed, more drilling proposed
- First phase drilling at the Nevertire Magmatic Complex has returned strong vectors, supporting Newcrest's prior comparison to Cadia
- The most prospective porphyry targets in the northern extensions of the Macquarie Arc, with drilling ongoing at Nevertire South

FUNDING BY
**NSW Govt, Fleet Space,
Kincora**
CATALYST(S)
**Drilling
Geophysics**
TARGETS

- Porphyry related copper-gold
- Epithermal gold-base metal style mineralization

Exploration Concept

- Situated within the northern covered extension of the Macquarie Arc (Molong belt)
- Previously identified by Newcrest as a district-scale intrusive complex
- Not drilled at the time due to the Cadia-Ridgeway and Far East discoveries - Kincora's technical director has been waiting since 1996 to test
- Along strike from the recent 14.7 Moz AuEq Boda-Kaiser discoveries within a shared structural corridor

Kincora Strategy

- Kincora pegged as open ground directly from NSW Government
- Executed multi-phase partnership and strategic placement with Fleet Space Technologies utilizing proprietary geophysics
- Fleet Space can earn a minority, non-carried interest through drilling
- Kincora awarded NSW Government co-funding grant following a competitive 2025 tender process
- First-ever drill hole completed, a technical success
- Discussions regarding follow-up activities with Fleet Space

STAGE

Brownfield

FUNDING BY

Kincora
Atomionics

CATALYST(S)

Geophysics
New partnership

TARGETS

- Epithermal gold-base metal style mineralization
- Porphyry related copper-gold

Historic / Nearby Production

- Located within the highly endowed and tightly held Cowal Igneous Complex (CIC)
- CIC is a world-class geological terrane hosting an endowment of >20Moz gold & 5Mt copper, including:
 - Evolution Mining's flagship Cowal mine, which generated ~\$3m/day cash flow Dec'2025 quarter
 - Estimated endowment of Marsden deposit pre dismembered is ~5Mt Cu & ~8-10Moz Au
 - Kincora's Technical Director, John Holliday, led the discovery of the Marsden deposit

Kincora Strategy

- Confirmed system: Limited drilling has intersected an intrusive-related gold system at the Jemalong Channel target
- Consolidate project: Kincora has expanded the projects footprint by 40%
 - Enlarged landholding previously held by Gold Fields who undertook the last prior phase of exploration to Kincora
- Kincora "traditional" gravity survey completed 1H'2026
- New partnership with Atomionics Pte. Ltd. for next generation "quantum" gravity technology and AI interpretation (at their costs)

FUNDING BY

Kincora

CATALYST(S)

 Independent reviews,
Geophysics / target refinement,
Drilling,
New partnership

TARGETS

- Epithermal gold-base metal style mineralization
- Porphyry related copper-gold

Historic / Nearby Production

- Located within the highly endowed and tightly held Cowl Igneous Complex (CIC)
- The CIC hosts >20 Moz gold and ~5 Mt copper, including Evolution Mining's flagship Cowl gold mine
- Fairholme is situated adjacent and along strike from the Cowl mine gold corridor
- Newmont is currently earning into and drilling porphyry copper targets on the northern licence boundary
- Prior over emphasis of porphyry copper model with more recent emergence of "Cowl" gold style targets

Kincora Strategy

- Relatively advanced exploration project, previously the focus of multiple majors with vectors from prior drilling and geophysics
- Multiple prior Kincora drilling programs with positive results
- Independent geological and AI reviews nearing completion, with resulting direct license application for extension of new targets
- Recent peer success at Waratah and LinQ Minerals, and emergence an epithermal target model at Boda-Kaiser and Cowl, further highlights Fairholme's prospectivity
- Ongoing discussions with potential new asset-level partners with scope for sole funded drilling given treasury position

CATALYST(S)

Independent reviews
Geophysics / target refinement
Drilling,
New partnership

TARGETS

- Epithermal gold-base metal style mineralization
- Porphyry and skarn related copper-gold

Historic / Nearby Production

- Interpreted to host part of the rifted Northparkes Igneous Complex which on the western margin of the caldera hosts Australia's second largest porphyry mine with a metal endowment of >24Moz AuEq
- Informal historic mining activities across full Trundle license strike with a >10km N-S at/near surface mineralised footprint

Kincora Strategy

- Relatively advanced exploration project, previously the focus of multiple majors with vectors from prior drilling and geophysics
- Kincora has invested >\$10-million to date into the project, with multiple phases of drill with new discoveries and positive results
- Independent geological and AI reviews nearing completion
- Recent peer success at Waratah and LinQ Minerals, further highlights Trundle's prospectivity
- Ongoing discussions with potential new asset-level partners with scope for sole funded drilling given treasury position

FUNDING BY

Kincora

CATALYST(S)

 Target refinement
New partnership

TARGETS

- Porphyry related copper-gold

Historic / Nearby Production

- Located within the same volcanic belt as major Macquarie Arc porphyry deposits:
 - ~30 km south of Boda-Kaiser (14.7 Moz AuEq) ~20 km north of Golden Cross (>2 Moz AuEq) and ~70 km north of Cadia (>90 Moz AuEq)
 - Adjacent to Inflection Resources' Bell River project, acquired from Newmont in 2025

Kincora Strategy

- Limited historical drilling has confirmed mineralized intrusions in the north and south of the license
- Earth AI completed exploration and drilling programs between 2022–2025, with Kincora electing not to extend an earn-in agreement
- Independent geological and AI reviews confirm new targets, incorporating newly identified geochemical and geophysical targets
- Recent discoveries at Waratah's Spur project provide additional encouragement for the broader district

Past Explorers

Why Invest?

01

Exposure to Tier-1 Gold-Copper Districts

Strategic land position within Australia's premier mining camps, home to some of the world's largest copper-gold deposits, with multiple analogues targets

02

Proven Discovery Team

Leadership and technical expertise with a demonstrated track record of creating shareholder value through originating projects and making major discoveries

03

Unique Hybrid Exploration Model

"Traditional" and "next generation" geoscience combining partner-funded and self-funded exploration to maximize discovery potential while minimizing dilution

04

Increasing Cash Position

Well-funded with Mongolian project divestment, partner-backed exploration and management fee income supporting increasing cash, sustained activity and reduced financing risk

05

Multiple Near-Term Catalysts

Ongoing drilling activities, more drilling and more deals proposed across a diversified portfolio with each project having a clear strategy for material value creation

DISCLAIMER

Certain disclosure may constitute "*forward-looking statements*". In making the forward-looking statements, Kincora Copper Limited (ARBN 645 457 763) ("*Kincora*" or the "*Company*") has applied certain factors and assumptions that the Company believes are reasonable. However, the forward-looking statements are subject to numerous risks, uncertainties and other factors that may cause future results to differ materially from those expressed or implied in such forward-looking statements. Such uncertainties and risks are described from time to time in the Company's filings with the appropriate securities commissions, and may include, among others, market conditions, delays in obtaining or failure to obtain required regulatory approvals or financing, fluctuating metal prices, the possibility of project cost overruns, mechanical failure, jurisdictional and counterparty risk, unavailability of parts and supplies, labour disturbances, interruption in transportation or utilities, adverse weather conditions, and unanticipated costs and expenses, variations in the cost of energy or materials or supplies or environmental impacts on operations. There can be no assurance that such statements will prove to be accurate, and actual results and future events could differ materially from those anticipated in such statements. Readers are cautioned not to place undue reliance on forward-looking statements. The Company does not intend, and expressly disclaims any intention or obligation to, update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by law.

QUALIFIED PERSON STATEMENT

The information in this presentation that relates to Mineral Resources and Exploration Results are those that have been previously reported with the original releases referred to in the Appendix of this presentation. In the case of Mineral Resources the material assumptions and technical parameters underpinning the estimates have not materially changed. The Company is not aware of any new information or data that materially affects the information included in the relevant original market announcements. This statement does not apply to instances in this presentation where the Company cites or refers to the Mineral Resources or Exploration Results of third-party projects which are included for the purposes of providing an overview of regional geology or activity.

JORC COMPETENT PERSON STATEMENT

The scientific and technical information in this presentation was prepared in accordance with the standards of the Canadian Institute of Mining, Metallurgy and Petroleum and National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("*NI 43-101*") and was reviewed, verified and compiled by Kincora's staff under the supervision of Peter Leaman (M.Sc. Mineral Exploration, FAusIMM), Senior Vice-President of Exploration of Kincora, and John Holliday (BSc Hons, BEc, member of the Australian Institute of Geoscientists), Non-Executive Director and Chairman of Kincora's Technical Committee, who are Qualified Persons for the purpose of NI 43-101.

References

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements, and that all material assumptions and technical parameters have not materially changed. Kincora also confirms that the form and context of the Competent Person and Qualified Person's findings presented have not been materially modified from the original market announcements. Furthermore, information disclosed from adjacent properties to the Company's is provided for general awareness and educational purposes and is not necessarily indicative to the mineralisation on the property that is the subject of the disclosure for the Company.

\$ = Australian Dollars unless otherwise stated

Tenement holdings, deposit, mining and plant locations based on public market data, including NSW Government public records (<https://minview.geoscience.nsw.gov.au/>)

District, regional and adjacent property information disclosed is provided for general awareness and educational purposes and is not necessarily indicative of any other project of the Company it is being compared to.

Slide 4: *"Why Invest; Hybrid Prospect Generator Model"*

Refer to the May 14, 2026, First Quarter Financials for a detailed discussion and analysis, and noting Kincora has unlocked potentially over \$100 million of potential partner funding for 7 earlier stage &/or non-core projects via 5 deals and 4 partners, with >20,000 metres of drilling and >A\$10m of partner funded exploration since late 2024, including:

- (a) NJNB project: The original up to A\$50m earn-in & JV agreement with AngloGold Ashanti for the Nyngan & Nevertire projects and the amended agreement to include the Nyngan South, Nevertire South and Mullia projects including another up to A\$50m earn-in & JV: refer May 28, 2024 release AngloGold Ashanti to earn-in to the NJNB Project and Apr 14, 2025, Second Major Earn-in Secured with AngloGold Ashanti (estimated cash calls (ex GST) approximately A\$6.4m, incl. 37 holes for 14,478m of drilling, Kincora currently the project manager receiving a 10% fee of expenditure). For more information on AngloGold Ashanti please visit their website at www.anglogoldashanti.com
- (b) Nyngan license: Fleet Space Technologies (which in December 2024 raised \$150m in a Series D financing) partnership under R&D Grant for geophysical surveys at Nyngan: refer Jul 25, 2024 release ANT and Gravity Geophysical Surveys at the Nyngan Project (estimated budget approximately \$500k). For more information on Fleet Space please visit their website at <https://www.fleet-space.com>
- (c) Wongarbon project: Fleet Space partnership for the Wongarbon project: refer Oct 16, 2024 release Kincora announces Strategic Investment & Expanded Partnership with Fleet Space (Fleet Space is to conduct ANT & gravity surveys with the right to fund >2000m of drilling for an earn-in/JV. Estimated budget for ANT & gravity surveys \$600k, follow up drilling >\$0.5m). On October 22, 2025, Kincora was awarded a cooperative funding grant from the NSW Government for up to A\$143,483 supporting a first ever drilling campaign to basement at the Wongarbon project which was drilled in 4Q'2026 to 414m with full results pending and discussions with Fleet Space ongoing regarding follow up exploration. Kincora is yet to seek reimbursement for the NSW Government grant.
- (d) Cundumbul project: Former Exploration Alliance with Earth AI (which in January 2025 raised US\$20m in a Series B financing) with multiple phases of soil, rock chip, geophysics and drilling. Estimated budget >A\$850,000, incl. 5 completed holes for >2500m with a VTEM geophysical survey completed. Agreement not extended at Kincora's election.
- (e) Bronze Fox project: On September 22, 2025, Kincora announced that at zero cost, the Company had resecured the full rights of the Mongolian copper-gold portfolio following Orbminco withdrawal from the September 2024 Earn-In Agreement as it now focuses on its Australian gold exploration. Orbminco had previously issued A\$450,000 worth of stock to Kincora and spent an estimated >A\$1.3-million on the Mongolian portfolio, including 2516m of drilling, 2025 field season mapping/soil/rock chip sampling plus ground gravity and magnetic surveys at the wider West Kasulu target and Shuteen North target. Separately, on May 19, 2026, Kincora announced execution of a Term Sheet and receipt of a non-refundable Option Payment of US\$1.5-million from Tumen Ail Coal LLC providing exclusivity to secure 100% of Kincora's wholly owned Mongolian subsidiaries. On July 2, 2026, Kincora announced execution of Definitive Agreements with Tumen Ail Coal LLC and has since received a further US\$3.5-million. The aggregate staged consideration for the transaction is US\$10-million, payable in full to Kincora, free and clear of any taxes, levies, or fees, but excluding certain contractual obligations of Kincora's - for further details refer to the press release Kincora receives option payment for divestment of Mongolian assets
- (f) Cowal East project: On March 10, 2026, Kincora announced (see Kincora consolidates, commences Geophysics at Cowal East) a new partnership with Atomionics initially for the Cowal East project, with a pathway for other projects. At Kincora's costs a "traditional" ground gravity survey has commenced. Atomionics, at largely its own cost, will analyze the results of this survey and complete a second phase survey utilising its proprietary new generation "quantum" sensors with results of the two surveys', coupled with the existing other geological and geophysical data for the project, integrated within its ORE-O AI-powered modelling platform. Kincora and Atomionics will then look to advance discussions for commercial testing of anticipated high priority drill targets.

A detailed discussion on the project and district is provided in our last quarter results - refer to the March 30, 2026 Annual Report to shareholders (MDA) FY2025 and Full Year Statutory Accounts FY2025, and noting

Recent M&A: Refer to Binding Scheme Implementation Deed with Harmony for MAC Copper Limited, May 27, 2025 & Feb 12, 2026 release *"Aeris Resources to Acquire Peel Mining"* by Aeris Resources

Prior results and sections from the Condobolin project: Refer to Kincora release Oct 14, 2025 *"Kincora advances the historic Condobolin mining field"*

Plan and section of proposed drilling at the Mertiliga discovery: Refer to Kincora release Apr 28, 2026: *"Kincora commences drilling at the historic Condobolin mining field"*

Valuation of Cobar explorers/producers ("Mkt Cap"): market capitalisation as @ COB Apr 24, 2026 with Binding Scheme Implementation Deed with Harmony for MAC Copper Limited, May 27, 2025

Cross sections of Cobar projects: Adapted by Kincora and internals noted from public disclosures from MAC Copper (MAC.ASX, prior to the transaction with Harmony Gold Mining) relating to its then CSA mine and Australian Gold & Copper (AGC.ASX) relating to its Achilles discovery. Strike & depths reported on the same scale

Slides 18-27: *"Macquarie Arc: Porphyry Projects"* section

">\$16b in M&A for producing assets", *"Two >10Moz Gold Equivalent Discoveries/Resource Growth"* & *">\$385m in exploration earn-in /JV's"* from public market disclosures and *Ocean Blue Equities* Oct 8, 2024 initiation research report on Waratah Minerals with the addition of Newmont's earn-in and joint venture agreements with Koonenberry Gold (KNB.ASX) for the:

(a) Junee porphyry project (\$23.9m of expenditure to date, ex the Jan 2025 drilling with Koonenberry Gold carried until commercial production); and,

(b) Fairholme porphyry project (Koonenberry carried until \$15m of exploration expenditure, with \$1.14m spent to date, ex 2025/2026 drilling programs).

Includes current resources and aggregate production from Cowal as reported by Evolution Mining and estimated endowment of the Marsden deposit per Evolution Mining's presentation at the Mines & Wines Sep 2024 conference *"New insights from the Cowal gold deposit"*

Macquarie Arc cover, deposits, belts & magmatic complex target outlines based on public access regional magnetics and geological data (<https://minview.geoscience.nsw.gov.au>)

A detailed discussion on the project and district is provided in our last quarter results - refer to the March 30, 2026 Annual Report to shareholders (MDA) FY2025 and Full Year Statutory Accounts FY2025, and noting

Prior results and sections from the NJNB project and Cadia-Ridgeway deposit: Refer to Kincora releases Aug 25, 2025 *"Positive drilling results at two Northern Junee-Narromine Belt projects"* & Feb 10, 2026 *"Nevertire expands and upgrades with drilling recommenced"*

Prior results, ongoing activities and latest plans for the Wongarboron project: Refer to Kincora release Nov 18, 2025, *"Kincora commences drilling at the Wongarboron porphyry project"*

Prior results, ongoing activities and latest plans for the Cowal East project Mar 10, 2026, *"Kincora consolidates, commences Geophysics at Cowal East"*

APPENDIX

DISTRICT PROJECTS

Increasing M&A, earn-in's & discovery

MACQUARIE ARC

Australia's foremost porphyry belt

- Newmont buys Newcrest (flagship Cadia)
- Evolution buys 80% of Northparkes (\$720m)
- Evolution post buying Cowal: >3x the resource (175,000m program ongoing), expands production >2x & \$3m a day cash flow 4Q'25
- Boda-Kaiser discoveries by Alkane (14.7Moz AuEq)
- Emerging new discoveries by juniors drive shareholder value
 - (i) One hole by Waratah Resources adds >\$100m
 - (ii) First phase of drilling by LinQ Minerals at the Dam adds >\$70m
- AngloGold Ashanti and Gold Field re-enter the district via earn-ins

COBAR

High-grade / long-life deposits

- New greenfield and brownfield discoveries
- Established and underutilized infrastructure/mills
- Scope for new wave of consolidation with initial activity
- MAC buys the CSA mine lists Feb'24, Harmony A\$1.6b takeover 2025
- Aeris \$214m deal with Peel for Mallee Bull & Wirlong: truck to existing mill
- Kingston commences mining, drill out at Mineral Hill, secures cash windfall & looks to fill the existing mill

Critical Minerals Hotspot

Becoming globally recognized

- Rio Tinto buys the Platina Scandium project
- Sunrise Energy re-rates from <\$30m to >\$1b market cap in 6 mths
- Energy Fuels \$447m offer for Australian Strategic Metals

NSW government Critical Minerals & High-Tech Metals Strategy 2024-2025

- Including Critical Minerals and High-Tech Metals Exploration Program

Arequipa Resources

Project generator model which led to the Pierina gold discovery in Peru, followed by an earn-in/JV and eventual takeover by Barrick

Reservoir Minerals

Earn-in/JV agreement with Freeport led to the Timok copper-gold discovery (Serbia) & takeover by Newsun Resources

Greatland Gold

Original earn-in/JV agreement with Newcrest for the Haverton copper-gold project in the Paterson WA

Inflection Resources

Earn-in/JV with AngloGold Ashanti for northern extension of Junee-Narromine porphyry belt NSW (neighbors Kincora)

Kincora Copper

Hybrid Project Generator with 8 projects (including two Earn-in/JV's for up to \$100m with AngloGold Ashanti next to Inflection)

AMARC Resources

Project generator model (up to \$200m earn-ins) for Cu-Au porphyry projects in BC with recent AuRora discovery

Prospect/project generators & Earn-out/JVs involved in other major discoveries incl.: Cascabel (Cornerstone Capital); Treaty Creek (Teuton/American Creek); White Rivers (Mark Creasy); & Oyu Tolgoi (Ivanhoe Mines), amongst others
Sourced from public access, industry & company reports, data & share prices (Modern Day Porphyry Example valuations at COB April 10, 2026). Excellent background information on prospect generator models available from Kenorland Minerals, GoldDiscovery.com, Rick Rule/Rule Investment Media, Matt Geiger/MJG Capital amongst others

Reduced Risk Profile

FINANCIAL STRUCTURE COMPARISON

	Traditional Explorer	Prospect Generator
Partner Funding	Limited or none	Significant portion of exploration budget
Capital Requirements	High – must fund all exploration	Lower – partner(s) fund advanced exploration
Income Stream	Unlikely	Often receives Management Fee(s)
Financing Frequency	High – frequent capital needs ~12 months typically	Moderate – extended runway between raises ~18-24+ months
Share Structure	Often larger share count and lower insider ownership	Generally materially tighter and more aligned

RISK PROFILE COMPARISON

	Traditional Explorer	Prospect Generator
Exploration Risk	Higher – often relatively “binary” and “all-in” on 1-2 projects	Lower – generally diversified across multiple projects
Equity Dilution Risk	Typically high	Generally materially lower
Management Risk	High – focused on promoting single asset and often team capacity constraints	Moderate – focused on building portfolio value and working with technical partner(s) (often larger teams)
