CAPITAN SILVER

Defining a generational silver
system in the heart of
Mexico's premier silver belt

July 2026

DISCLAIMER

Forward Looking Statements

This document contains forward-looking statements and factual information that are current as of the date the document was originally created for Capitan Silver Corp. (“the Company”) disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Forward looking statements include, but are not limited to, statements with respect to the timing and amount of estimated future exploration, success of exploration activities, expenditures, permitting, and requirements for additional capital and access to data. Forward looking statements involve known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward- looking statements. Such factors include, among others, risks related to actual results of current exploration activities; changes in project parameters as plans continue to be refined; the ability to enter into joint ventures or to acquire or dispose of properties; future prices of mineral resources; accidents, labor disputes and other risks of the mining industry; ability to obtain financing; and delays in obtaining governmental approvals of financing. Any statements, opinions, projections, forecasts or other material contained in this presentation do not constitute a commitment, representation or warranty by the company or its directors, officers, agents or employees. The directors, officers, agents and employees of the company shall in no way be liable to any person or body for any loss, claim, demand, damages, costs or expenses of whatsoever nature arising in any way out of, or in connection with, the information contained in this presentation. This presentation does not constitute an offer to sell securities and is not a solicitation of an offer to buy securities. It is not to be distributed to third parties without the consent of the company. An investment in the company is considered to be speculative in nature. Each individual should rely solely upon its own investigations and inquiries with respect to the company and agrees it will not in any way rely upon this presentation. The company recommends that you consult your own professional advisor(s).

QUALIFIED PERSON

The scientific and technical data contained in this presentation relating to Capitan’s mineral properties were reviewed and approved by Marc Idziszek, P.Geo. Mr. Idziszek who is a non-independent “Qualified Person” under National Instrument 43-101.

Investment Opportunity

A consolidated, high-grade silver district in Durango — advanced with modern exploration tools, a fully funded 2026 drill program, and a tightly held share structure.

DRILL PROGRAM
UNDERWAY IN 2026

MEXICO

- Largest global producer of silver
- Huge mining infrastructure with access to state & federal grid
- >1,000 years of rich mining heritage
- Located in the heart of Mexico's primary silver belt - Durango is the #1 mining state in Mexico for safety

New Silver Exploration Company

- The original mines and property which launched Peñoles Mining Company in the late 1890's (Past-producing high-grade silver district)
- First time since the Mexican Revolution that this property has been consolidated and advanced using modern exploration tools

Advanced Exploration in Durango, Mexico

- Large near surface intermediate sulfidation epithermal system
- + 3.7 km silver mineralized trend
- Multiple high-grade silver targets with scale
- NEW: 60,000-metre drill program underway in 2026

Strong Management Team

- Team has generated +C\$1 billion valuation from successfully executing projects in Mexico
- Advanced & developed: Five (5) gold projects +1M oz gold
- Financed & built: Three (3) Mines – on time and on budget

Tight Share Structure with Quality Shareholder Base

- One of the tightest share structures in the Mexican silver explorer peer group: Less than 1/3 of the shares outstanding of its peers
- Over 70% of CAPT's common shares are tightly held

A Disciplined Approach

NO FREE SHARES

- ✓ No free shares issued to founders, management or bankers
- ✓ Most shares issued at \$0.20

QUALITY FINANCINGS

- ✓ Two of the last three financings have been completed at a +30% premium to market price
- ✓ Last three (3) financings have been led by a new strategic investor

ROYALTY FREE

- ✓ CAPT management has contracted to remove all royalties on the project
- ✓ Royalties impair project economics for equity owners

Tight Share Structure

(as of June 1 2026)

Shares Issued **128.5M**

Options **5.9M**

Warrants **Nil**

Market Cap **\$287.4M**

Fully Diluted **134.4M**

Tightly Held **+70%**

TOP THREE SHAREHOLDERS

- Jupiter Gold & Silver Fund - **15.6%**
- Michael Gentile - **11.4%**
- Construplan - **8.8%**

Cruz de Plata

SILVER-GOLD PROJECT

A historically-producing,
high-grade silver asset

-  Located in friendly mining State of Durango
-  In the heart of Mexico's silver belt;
near multiple operating mines
-  Gentle topography
-  Good infrastructure (road, power to the
property, paved highway)
-  Community agreement in place until 2030
Good relationship for over 13 years of work
-  Historical production grades: (Jésus María)
300-2,000 g/t Ag, 3-12% Pb and 4-10% Zn;
(San Rafael) 300-1,000 g/t Ag

SAFEST STATE FOR MINING

**Located in Mexico's top mining state for
safety** according to the 2025 Mexico
Peace Index¹

1. <https://www.visionofhumanity.org/wp-content/uploads/2025/05/MPI-ENG-2025-web.pdf>

Deposit Type

Cruz de Plata is an Intermediate Sulphidation Epithermal System – *an asset type highly coveted by majors*

INTERMEDIATE SULPHIDATION EPITHERMAL SYSTEMS:

- Some of the largest silver deposits in Mexico
- Have potential to be "Company Makers" with attractive economics if they have both grade and scale
- Long-life assets: Potential for significant scale; these systems tend to have tremendous vertical continuity (up to 800m)

Recent M&A (Gatos Silver & SilverCrest Metals) have made it more difficult for investors to find single asset companies that have quality silver projects with both grade and scale

PROJECT	ACQUIRER / OWNER	MINERALIZATION TYPE	LOCATION	DEPOSIT TYPE	COMMODITY	VALUATION
Fresnillo	Fresnillo Plc	Intermediate Sulphidation System	Zacatecas, Mexico	Underground	Silver-Gold	C\$3.5B (Analyst NAV estimate)
Juanicipio	Pan American / Fresnillo Plc	Intermediate Sulphidation System	Zacatecas, Mexico	Underground	Silver-Gold	C\$6.6B (M&A value for 100%)
Las Chispas	Coeur Mining	Low to Intermediate Sulphidation System	Sonora, Mexico	Underground	Silver-Gold	C\$2.4B (M&A 2024)
Los Gatos	First Majestic	Intermediate Sulphidation System	Chihuahua, Mexico	Underground	Silver-Gold	C\$1.4B (M&A 2024)
Panuco	Vizsla Silver	Intermediate Sulphidation System	Sinaloa, Mexico	Underground	Silver-Gold	C\$1.6B (Market value)
San Dimas	First Majestic	Low to Intermediate Sulphidation System	Durango, Mexico	Underground	Silver-Gold	C\$1.2B (Analyst NAV estimate)

CRUZ DE PLATA

Mineralization Improving at Depth

Drill Section Highlights

01 Depth Expansion Potential at Cruz de Plata Given the deep-rooted nature of intermediate sulphidation epithermal systems, there is an interesting opportunity for silver mineralized zones to widen at Cruz de Plata	02 Broad Multi-Vein Silver Zones at Depth Drill holes 25-ERRC-52 and 25-ERRC-38 (pictured above & below, respectively) show broad silver mineralized zones intersecting multiple veins, with higher silver grades being encountered at depth.
03 Shallow Drilling Leaves Room to Grow Drilling at Cruz de Plata is still relatively shallow and remains open to expansion at depth	04 2026 Campaign Targets 500m Depth A key objective of the 60,000m 2026 drill campaign is to extend silver mineralization along the Jesus Maria Silver Trend to a target depth of 500m

CROSS SECTIONS

HIGHER GRADES ENCOUNTERED AT DEPTH

CRUZ DE PLATA

A Silver System With Strong Continuity

2020

Go Public Event

800m

- Pre-Capitan, the property had approx. 3,000m of diamond drilling near the historic Jesus María mine where an inferred open-pit Mineral Resource was estimated in 2015.
- Property had approx. 1,200m of diamond drilling East around the historical San Rafael workings (not included in the 2015 Mineral Resource Estimate)
- The area between the two zones, where the El Refugio historical workings are located, belonged to Fresnillo.

2022

Maiden Drill Campaign + Fresnillo Land Deal

1.3km

- Capitan performed its first round of drilling in the silver system in 2022, focusing mostly on testing Jesus Maria further at depth, as well as the Gully Fault Zone. Some drill holes were also included in San Rafael.
- Later in 2022 the Company acquired the El Casco property from Fresnillo, which included 5 diamond drill holes in the El Refugio area. These holes immediately gave the zone a 500m extension on-strike to the east.

2026

Current Status: Program Underway

2.5km

- In 2025, the Company began a 15,000m drill campaign focused on expanding the on-strike continuity close to surface, successfully bringing the Jesus María Silver Trend to a continuously drilled strike length of 2.5km.
- The Company announced a new 60,000m drill program for 2026 that will test the further on-strike extension to the east and at depth of the Jesus Maria Silver Trend, as well as new targets on the newly-consolidated property.

Project-Scale Comparisons

JESUS MARÍA SILVER TREND – CRUZ DE PLATA – CAPITAN SILVER

2015 Resource (with only 3,000m drilling) 7.5M tonnes @ 62.3 g/t Ag and 0.1 g/t Au for 15M Oz Ag and 26k Oz Au.
Estimated for open pit only.

Approximately 25,000m drilling as at end 2025;
 60,000m planned for 2026

Current Market Cap:
~US\$200M

Las Chispas | Silver Crest

2016-2023: 690,000m drilling

Sold to Coeur for

and 4.91% Zn for 66.8M Oz Ag @ 217g/t Ag

- 12.83 M tonnes (Indicated) @ 427 g/t Ag, 2.1g/t Au, 2.11% Cu, 3.68% Zn and 0.13% Cu (176M Oz Ag, 867k Oz Au)

Note: Not based on 43-101 Technical Reports; the images presented are intended to illustrate the scale and style of mineralization at the Cruz de Plata project. This comparison is conceptual in nature and should not be taken to infer either tonnage or grade at Cruz de Plata and that any portion of the Cruz de Plata project will be mineable in the future.

CRUZ DE PLATA

Project Scale Comparisons

- Cruz de Plata's Jesus Maria silver mineralization begins at surface, has excellent continuity, and remains open at depth
- High silver grades found at Cruz de Plata are consistent with those found at Las Chispas, Los Gatos, and Juanicipio – with mineralized zones and grades improving down-dip
- Significant near-surface mineralization in comparison to the above projects, with multiple new targets identified

Note: Not based on 43-101 Technical Reports; the images presented are intended to illustrate the scale and style of mineralization at the Cruz de Plata project. This comparison is conceptual in nature and should not be taken to infer either tonnage or grade at Cruz de Plata and that any portion of the Cruz de Plata project will be mineable in the future.

Mineral System

New Mineral system model put together in recently consolidated property using multiple data sets (geological mapping, surface sampling and geophysics)

2026 drill program expanded to 60,000m

Targets:

1) San Rafael, 2) Gully Fault, 3) Jesus Maria East, 4) San Rafael West, 5) Jesus Maria North West, 6) Jesus Maria North, 7) Providencia, 8) Casco Norte, 9) El Tubo Gold, 10) Capitan Hill

10

Priority targets

2026 drilling program fully ramped up

Completed in Q2 2026

Newly Acquired Geophysics Confirms Model

2026 Drilling Program

60,000m multi-rig drill campaign

Represents a 400% increase compared to the 2025 program

- Planned meterage for 2026 more than doubles all historic drilling completed on the property

2026 FOCUS

CORE DRILLING

Expanding advanced silver-mineralized zones on the 3.7-km Jesus Maria Silver Trend

(including the Gully Fault and Peñoles Fault targets)

RC DRILLING

Testing new high-grade silver targets at Casco Norte, La Purisima and Jesus Maria Northwest

CORE AND RC DRILLING

Additional drilling at the Capitan Hill oxide gold deposit and testing of high priority gold exploration targets

4 Drill Rigs

3 Core Rigs

1 RC Rig

Valuation

Capitan Silver shares are attractively priced, trading at a discount to the silver peer group average.

Favourable Sentiment for Silver

Spot silver prices continue to be elevated

Royalty Free

Capitan Silver is one of the few companies whose flagship project will be royalty free. All remaining royalties are under contract to be eliminated.

Significant Opportunity

Capitan Silver has an advanced stage intermediate sulphidation system with good grades. These types of projects are highly sought after by majors. Three (3) +\$Billion buyouts since Sept 2024. Outside of Vizsla Silver (valued at ~C\$1.9B), Capitan remains the next most advanced project in Mexico

Tight Share Structure

Capitan has less than 1/4th of the shares outstanding, normalized for share consolidations since Jan 2022.

SUMMARY

Capitan Silver is defining Mexico's next great silver project

Grade and Scale

Our Flagship project, Cruz de Plata, hosts a robust silver mineralized system (intermediate sulphidation epithermal system), these assets are highly coveted by the majors

Target Rich

Cruz de Plata is target-rich with several parallel silver mineralized structures to the north and a bonus bulk tonnage oxide gold project adjacent to the silver system

Fully Funded

Successfully raised C\$29M in late-2025; fully-funded 2026 drill program announced

Drill Results Pending

Actively drilling with new assay results released monthly
